

Writing Task

Write an information report about the animals in African Savanna.

The Animals Empire

The African Savanna is an open landscape of grassland in tropical Africa. It is hot and dry, and it has season of heavy rains. It is an Animal Empire with zebras, elephants, lion and cheetahs living on it.

Lion

Lions are the only animals to live in groups. There are male lions, female lions and lion cubs. Male lions have mane. Female lions have tail tufts. They can give birth to lion cubs.

Lions eat meat and they hunt wildebeest, zebras and water buffaloes. Lions can hunt to feed the group.

Elephants

Elephants are the largest animal on Earth and they have the biggest brain in the animal world. They have long and flexible trunks. They have curved tusks. Elephant can take dust baths with the help of their trunk. Elephants eat leaves, branches, bark and grass.
